

Hemant Baraapatre

Engineering Manager@ Unity Software Inc.

Resume Summary

As an engineering manager passionate about building high-performing team that deliver real business impact through modern technology and thoughtful engineering culture.

My technical foundation spans the full spectrum of enterprise and cloud-native development. I lead teams building on Salesforce, React.js, and GCP, with deep integration work across Workato and N8N. Lately a lot of my energy is going into Agentic AI — not just as a concept, but figuring out how autonomous agents actually fit into real engineering workflows and change how teams deliver.

Work Experience

July 2026 – April 2024

Engineering Manager, Unity Software Inc. Bangalore, IN

Led the Enterprise Applications engineering function supporting Finance, HR, Revenue, and business-critical enterprise platforms. Managed cross-functional teams across Workday, NetSuite, integrations, Full Stack Engineering, and QA, driving delivery, automation, platform modernization, and operational excellence.

- Led strategic Finance and enterprise application initiatives across Workday, NetSuite, RevPro/Zuora Revenue, Salesforce, Tipalti, Adaptive FP&A, and Workato.
- Drove an enterprise automation program targeting 25K+ hours, achieving approximately 18K automation hours, reducing manual effort and improving operational efficiency.
- Delivered the One Grow Project, progressing from build completion through testing, UAT, and go-live readiness.
- Led the SOR Reversal project, validating end-to-end integrations across Salesforce → Workday → NetSuite → Tipalti.
- Managed NetSuite consolidation and modernization, including legacy extraction, File Cabinet data extraction, reporting, dashboards, token configuration, and upgrade initiatives.
- Directed M&A integration programs, including SpeedTree integration, Tapjoy/Unity legacy extraction, NetSuite consolidation, and RevPro invoice migration.
- Led MP Invoicing Phase 2 and Workday Finance initiatives including Supplier Invoice Event, invoice attachments, and APAC approval matrix enhancements.
- Built and optimized integrations using Workato, Workday EIB/Studio, REST APIs, SFTP, and GCP.
- Strengthened production reliability through monitoring, PagerDuty, incident management, SLA governance, and root-cause analysis.
- Partnered with Finance, HR, Revenue, IT, and business leadership to deliver scalable solutions and drive engineering excellence.
